

Computing In The Curriculum: Then And Now

Bob Harrison-Ministerial Education Technology Action Group

bob@setuk.co.uk

www.setuk.co.uk

Department
for Education

Learning how a computer works, rather than just how to work a computer

Department
for Education

Ensuring children are no longer just passive users of technology

Equipping young people with the skills which are in demand from industry experts

Department
for Education

Defining a new modern language

Earlier exposure to lessons previously reserved for university level computer science students

Expanding the use of digital technology outside the computer classroom

Department
for Education

Allowing teachers to be creative with computers

Department
for Education

Giving children the knowledge and the confidence to stay safe online

Establishing computer science as a core academic subject

Department
for Education

Thank you – Any questions
