

Lior Katz is the head of the High Risk Clinic at the Department of Gastroenterology at Sheba Medical Center. He also serves as the chief of the Gastroenterology branch in the IDF. He received his MD from Hadassah Medical School at the Hebrew University in Jerusalem, Israel. After his clinical training in Gastroenterology and Hepatology at Sheba Medical Center in Tel-Aviv, Israel, he became a faculty member there and at Tel-Aviv University. He spent 2.5 years as a visiting scientist in Dr. Lopa Mishra's lab at MD Anderson Cancer Center and in the High Risk Clinic under the supervision of Dr. Patrick Lynch. His research focuses on CRC and hepatocellular carcinoma (HCC) prevention. He has published clinical as well as basic research papers regarding viral hepatitis, other viral diseases, HCC and inflammatory bowel disease. His clinical work covers high risk patients for colorectal and other GI cancers, as well as general gastroenterology.
